24/7 Medical Support

Those who want to protect their health or restore their health, we bring together the best hospitals and doctors in our country who provide health services. We ensure that those who come to our country for the treatment of various ailments from all over the world are treated in the fastest, most comfortable and healthiest way. Medical support is available 24/7 by Prusa Medica.

Support Time Treatment

In order for our patients who enter our country in search of treatment, not to be forced in this process and not to deal with the procedures, everything necessary during the treatment is prepared in advance. As long as the treatment continues, all that is required is performed by Prusa Medica.

Medical Consulting

The doctors who serve in Prusa Medica determine which hospital the patient will be treated in and serve as a bridge between the patient and the doctor.

As Prusa Medica, we are happy to organize cross-border health services. Prusa Medica is an innovative healthcare platform established by professionals and communication professionals to provide high quality and fast healthcare services to patients both abroad and in Turkey. In this platform, leading hospitals and healthcare providers specializing in various treatment areas are offered; turkey's improved infrastructure and quality of service in the field of health are emphasized. Prusa Medica's responsibility is to change and continually improve the way people access health care in Turkey. Our vision is to be the most reliable medical tourism platform where people can learn about the various treatment options provided by our doctors by doing careful studies, especially for the specified diseases. As we move towards our goal, we will inspire our representatives to help patients recover their health.

Health Tourism

Prusa Medica provides the opportunity for our patients who want to travel after treatment to reach the hospitals that offer the best treatment at a reasonable price, as well as to enjoy the historical and natural beauty of Turkey. Prusa Medica allows you to get a special discount of up to 30% at many hospitals and does not charge any fees from patients. We provide professional, confidential, personalized employment opportunities for doctors and ancillary healthcare workers. Your privacy is important to us. All information given to us is confidential. We will not offer candidate information or Resume (CV) to your client or anyone without your permission. There is never a fee for candidates looking for jobs for our job placement services. When you join our network, your CV will be forwarded to private employers to find the right opportunity for you in the long term. We offer our expertise every step of the way to ensure a successful job placement, and we listen carefully to both your personal and professional needs. Through our professional healthcare consultancy, we create operational values, whether in your corporate and regional offices, individual facilities or specific service lines. We are improving your facility and International Patient Services Department management with hospital counseling to help ensure Optimal patient care and financial stability. Prusa Medica contributes to the

improvement of sectoral processes by rigorous monitoring over the course of treatment, rather than connecting the patient and the healthcare provider. We provide a dedicated, central point of contact for patients who benefit from the expertise of Prusa Medica, which helps improve patient compliance. Using our data based on the experiences of Prusa Medica patients, we conduct a comprehensive analysis and data review of your organization's current culture and impact on patient experience. This report forms the basis of your action plan to move your culture where it should be.

Online Health (24/7)

Our team of medical experts at Prusa Medica provides guidance to patients to access appropriate and effective treatments 24 hours a day, 7 days a week. Patients and their relatives can register in our system at Prusa Medica and benefit from the information service free of charge.

Medical Companion

As soon as the patient enters the hospital with or without a companion, he is met by the medical chaperone assigned by Prusa Medica, who informs him that he will be with him through the treatment process. It is present in all healing processes of the patient before, during and after the treatment.

Medical Network Management

We have agreements with health organizations all over Turkey. A new one is being added every day to all of our health institutions within our medical service network. If there is a hospital or doctor that is specially preferred by the patient, the patient can be treated wherever he or she wants by means of agreements.

Medical Interpreting

Medical interpreting, which is directly related to human health, is a job that needs to be done meticulously. Medical interpreter services are provided by experts in the field working within Touran Medical.

Why to Prefer Medical Services in Turkey?

Your health and holiday destination... Turkey has become the center of medical tourism for the customers from each continent of the world seeking the best medical care possible.

Thanks to the state health system, reforms and private investments in the medical services, Turkey has become quite competitive due to high-quality doctors, advanced technology and reasonable prices as compared to the USA and European countries.

Cost is one of the attractive reasons for benefiting from the qualified medical care while using the savings to enjoy a plane journey and potentially having fun during a trip or vacation. Even after the travel expenses are added on, patients generally return home with extra money in their pockets.

Istanbul, the one and only city located on two continents, has brand new private hospitals. With more than forty hospitals accredited by the Joint Commission International, Turkey's private medical infrastructure is now a solid option in the global medical tourism industry.

The Ministry of Health of the Republic of Turkey stated that in 2013 500,000 visitors were treated in the Turkish hospitals.

Turkey has hosted various civilizations throughout history. Today's Turkey is as diverse as its culture. Being a touristic destination, Istanbul is home to historical sites as well as an active day and

night view. Turkey offers a wide variety of international cuisine and shopping. Come and experience Turkey and see what it can offer to you while treating your body and your soul by the Rumi views.

170 health institutions with JCI Joint Commission International certificate of conformity

There are 60 internationally recognized medical faculties in Turkey. Due to Turkey's European Union candidate country status, Turkey offers medical services at the European standards.

The long-established pharmaceutical companies such as Pfizer, GlaxoSmith-Kline, Johnson and Johnson, Astra Zeneca have laboratories and production facilities in Turkey.

Turkish Red Crescent's blood bank having the JCI Certificate of Conformity is at the forefront with its reliability. Turkey's Strengths in the Medical Tourism

Turkey is an advantageous country for medical tourism, whose purpose of emergence is to provide quality and more economical treatment or improve health. These advantages can be listed as follows:

The most important advantage of Turkey in medical tourism is that an umbrella structure and state policy (SATURK) have been developed to coordinate all the medical tourism works. Having a national airline like THY,

which provides access from the highest number of flight destinations in the world

An significant part of our health institutions has reached the level to compete with the west in terms of technological infrastructure and Turkey is the regional leader in terms of the infrastructure of Training and Research Hospitals.

Turkey ranks 2nd in the world in terms of the number of hospitals accredited by JCI.

Turkey's another important advantage in the medical tourism is that it has a large number of available health-themed thermal resources and that it ranks 1st in the Europe in terms of the number of available thermal resources.

Treatments

Diagnosis and Imaging
Dental
Gamma Knife
Pyxis
Thermal SPA and wellness
Geriatrics and Home Care

Advantages of Having Medical Services in Turkey

The medical services in Turkey are controlled by the Ministry of Health through a centralized state system. Turkey, where the government increased the rate of budget allocated to the medical services in 2003 and which is located at the junction of the European and Asian continents, is in a crossroads position in terms of air and road transportation. Importance attached to health poses great importance in traveling of about 400,000 foreign patients every year to Turkey. As a result of the joint studies conducted with the health centers and the medical tourism agencies, the number of patients coming to Turkey for treatment is increasing every passing day and goes beyond the medical objectives set for 2023. Turkey has introduced a comprehensive health reform program aimed at making a large part of the population healthy. Turkey Statistical Institute stated that some 76,3 billion TL was spent within the scope of medical

services in 2012. According to 2013 figures, there are 30,116 health institutions in Turkey and there are an average of 573 patients per doctor. In addition, the number of beds per 1000 people is 2,64. Being in the process of accession to the European Union, Turkey makes large investments in the fields of health, technology and education. Turkey is among the countries with the highest number of hospitals in the world.

Turkey ranks 6th in the world in terms of attracting tourists with 39 million visitors a year. Turkey carries out significant attacks on tourism and develops its capacity and quality of tourism each year. At the same time, Turkey has an international reputation in the hospitality field. Turkey is preferred by millions of tourists every year with its hospitable, warm, quality services and world class facilities. It is the new favorite country of tourism as well as health tourism with its domestic and international investments in the field of hotel management and health.
